

# Quiet, Cordless Fall Monitoring

**New!**

## With Smart Caregiver's New **CORDLESS®** Fall Monitoring Family.

For 2011 Smart Caregiver introduces revolutionary fall monitoring technology; CordLess!® Smart's CordLess System products use patented wireless technology to eliminate cords between bed and chair pads and floor mats to monitors.

While Caregivers will appreciate having one less cord to deal with, the benefits of Smart's CordLess System are far greater than that. Eliminating the cord between sensor pads and monitors enables facilities to:

- **Eliminate Bedside Alarm Noise!**

Cordless technology allows monitors to be outside resident's rooms and placed where caregivers want them

- **Have complete control over alert volume**

Caregivers can adjust the alert to any volume from 0 and 110 decibels

- **Create a Comprehensive Fall Monitoring System**

Easily add components such as chair sensor pads, floor mats, pagers and central monitors

- **Easily Integrate with Existing Fall Management Programs**

CordLess® central monitoring, paging and TamperProof® technology result in accurate evaluation of resident mobility

- **Reduce Resident Tampering**

Monitors can be placed out of residents' reach. Plus, Smart's Caregiver Key® mode ensures that only caregivers can reset monitors

- **Reduce Tripping Hazards and Eliminate Broken or Tangled Pad Cords**

## **CORDLESS®** Products

**Chair Sensor Pads**

**Floor Mats**

**Caregiver Pager**

**Central Monitor**
